

PAIMA S.p.A., with registered office in Osimo (AN), carries out its activities in compliance with the environmental protection and the principles of sustainable development.

The Company Management establishes this Environmental Policy as a guide for the continuous improvement of its environmental performance, recognizing environmental protection as a fundamental element for the development of the Organization.

All the activities carried out are oriented towards service quality and the reduction of the environmental impacts associated with its processes, products and services.

The Organization is aware of the need to preserve the environment and to operate in compliance with the principles of sustainable development; therefore, PAIMA S.p.A. has prepared and implemented an Environmental Management System compliant with the UNI EN ISO 14001 standard, in order to disseminate and share its environmental objectives and involve relevant stakeholders in achieving the established goals.

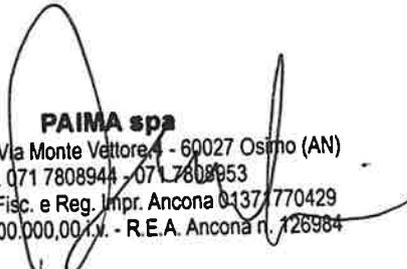

Through the Environmental Management System, PAIMA S.p.A. undertakes to ensure the continuous improvement of its environmental performance and compliance with all applicable legislative obligations and other requirements applicable to its activities.

The Company identifies the UNI EN ISO 14001 standard as a suitable tool for the constant improvement of the effectiveness of its Management System, through an approach based on risk-based thinking, analysis of the context in which it operates of the needs of the interested parties.

In particular, Management undertakes to:

- comply with all applicable legislative and regulatory environmental requirements;
- promote awareness and training of staff on the correct management of natural resources and on the separate collection of waste;
- spread, both inside and outside the Organization, a culture oriented towards environmental protection;
- pursue the continuous improvement of the Environmental Management System;
- periodically review this Policy, the environmental objectives and the Management System;
- collaborate with suppliers in order to promote behaviors and solutions aimed at reducing environmental impacts along the supply chain;
- develop adequate control systems to monitor significant environmental aspects and their impacts;
- orient business processes towards solutions with a lower environmental impact, with particular reference to:
  - reduction and monitoring of energy and water consumption;
  - correct management, traceability and disposal of the waste produced;
  - reduction of waste generation and the inefficient use of resources;
  - monitoring of emissions into the atmosphere, water discharges, noise and any other possible impact on the environment;
  - pollution prevention and protection of the ecosystem.

This Environmental Policy is made available through publication on the company website and is displayed on company premises and it is periodically reviewed by the Management of PAIMA S.p.A. in order to ensure its continued adequacy.
